DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species.

I. Type of Optimization

Species 1 (Maximum Distance): Claims 84.

Species 2 (Maximum Spin): Claim 85.

Species 3 (Maximum Launch Angle): Claim 86.

Species 4 (Maximum Ceiling): Claim 87.

Species 5 (Determining an appropriate velocity based on the launch angle or spin rate): Claims 67-69 and 71-78.

Species 6 (Maximum Velocity for an optimized launch angle and spin rate):
Claims 82-83.

II. Type of Modification to Equipment

Species 1 (Shaft Length): Claims 10-11 and 75.

Species 2 (Changing Shaft Weight): Claims 12-13 and 75.

Species 3 (Changing Shaft Material): Claims 14-15.

Species 4 (Changing Tip Size): Claims 16-17.

Species 5 (Changing Shaft Torque): Claims 18-19 and 75.

Art Unit: 3711

Species 6 (Changing a Grip): Claims 20-21.

Species 7 (Changing Grip Weight): Claims 22-23.

Species 8 (Changing Head Center of Gravity): Claims 24-25 and 74.

Species 9 (Changing a Ball Spin Characteristic): Claims 26-27.

Species 10 (Changing Lie Angle): Claims 28.

Species 11 (Changing Head Loft): Claim 74.

Species 12 (Changing Head Size): Claim 74.

Species 13 (Changing Shaft Stiffness): Claims 75 and 80-83.

III. Type of Instruction to Swing

Species 1 (Use information of golfer's ability and equipment to instruct): Claims 2-4.

Species 2 (Use swing data to produce incline load pattern): Claim 79.

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for each group for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. The election of species from each group

Art Unit: 3711

should be consistent with each other so that one method is able to be conducted.

Currently, it is uncertain what claims are generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Art Unit: 3711

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

2. A telephone call was not made to request an oral election to the above restriction requirement due to the complexity of the restriction requirement.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
